

LNG Management Expertise

V.Ships provides comprehensive ship management and crewing services to LNG and LNG Fuelled vessel owners. With over 20 years' experience, we have LNG vessel expertise at sea and ashore with all containment and propulsion types and all vessels including LNG bunker vessels.

We understand that the key challenges are to operate on-budget, avoid accidents, minimise downtime, comply with all environmental policies, retain high quality crew and maintain exemplary vetting and PSC performances.

A member of The Society of International Gas Tanker and Terminal Operators (SIGTTO) and the Society for Gas as a Marine Fuel (SGMF).

Best in Class Ship Managers

With assets including tankers, bulk carriers, gas carriers, cruise, offshore, passenger vessels and containerships under management, V.Ships has access to an international network of over 44,000 seafarers across all sectors including over 1,000 LNG experienced crew. These are supported by an onshore team of 2,750 colleagues in over 30 countries and 60 offices around the world.

Safety is our number one priority. The wellbeing of your seafarers on board and the security and efficiency of your maritime assets will be at the heart of everything we do. By partnering with us, you will benefit from our excellent track record of managing seafarers over the past 30 years on behalf of hundreds of clients.

Why collaborate with us?

V.Ships has been providing Ship Management and Crewing Services to LNG vessels for over 20 years. We will manage your risks and maximise your returns.

- **Safety and the preservation of the marine environment is our priority.** V.Ships is actively involved in numerous industry initiatives, including the Maersk McKinney Moller Center for Zero Carbon Shipping.
- **World Class Ship Management services.** Unrivalled scale, depth and breadth of knowledge and expertise and support network for all tanker operations.
- **Senior leadership experience** in leading roles with top quartile LNG owners and charterers, and superintendents first hand experience on LNG vessels.
- **Excellent relationships with Oils Majors and industry.** We keep an excellent working relationship with the Oil Majors at all levels within the organisation to maintain vettings and positive vetting clearances.
- **Best in class LNG and LNG as Fuel Crewing capabilities.** Experience in providing Crew management to leading LNG operators. A pool of suitable candidates identified within our network of LPG officers are ready to be up-skilled to meet LNG segment growth.
- **Extensive LNG and LNG as Fuel training programmes.** We developed appropriate LNG competency training course to provide crew with the rights skills.
- **Well established Management of Change process.** Proven track record of successful transfers of LNG while preserving Oil Majors status.
